INTRODUCTION TO
PELVIC-HEART
INTEGRATION
International Workshop
in English

Guided by Dirk Marivoet
and Elisabeth Renner

We often resign ourselves to repeating cycles of being attracted to and then rejected by the opposite sex. This pattern of finding short lived happiness and joy often leads to plunging back into unforeseen frustration and heartbreak. We can become intrigued and overwhelmed by the mystery of the opposite sex. Yet, when we really feel both the masculine and feminine already inside of us and then letting these parts of us interact with each other, we can find our way to sustainable excitement, deep love and even ecstasy. Our sexuality then comes from the wonderful mystery within us and guides us in our relationship with others.

In this workshop we will discover how our characteristic breathing patterns, thoughts, emotions, and body armour block the free flow of our life force and inhibit our capacity for sensual pleasure and orgasmic release. We use breath, movement and mindful touch to feel the unity of love and satisfaction. Psychodrama, imagery and role plays are helping us to explore the sexual and heart energy from our ancestors and our inner triangle (father, mother, child) which becomes a template for future relationships. Experiencing the spiritual presence of our ancestors is powerful and helps us to heal old wounds carried through generations. Pelvic-Heart Integration is helpful and supportive in creating a new wave of consciousness in all of us.

Pelvic-Heart Integration explores together with you the unconscious emotional body armor and breathing patterns, as well as habitual protection and defense patterns, that were learned in the Triangle Mother/Father/Child that determine your relationships in the here and now. Role playing, Imagination, Body Talk, „Hands-on“ techniques, expression and movement, as well as exchanges in the group, accompany you in this process. Work with our ancestors and their spiritual force support you in bringing old, passed on wounds through generations, to a healing movement. New pulsating vibrancy and creativity begin to flow and to create a new source of Bodymind Consciousness.
